Aslam Muhammed

Software Engineer

Abu Dhabi, UAE (UAE Resident) | +971 50 802 4425 | aslammhdms@gmail.com | linkedin.com/in/aslammhdms

Summary

Software engineer with 5 years of experience building business systems in .NET and SQL Server, with React Native for mobile. Currently the only developer at Tristar Engineering & Construction, moving the company from its old ePROMIS ERP to Tricore ERP. Before that, built a facility management system used across 19 Almadina HyperMarket branches, and spent four years on ERP and eCommerce products at Skien Software Lab.

Experience

Software Engineer, Tristar Engineering & Construction, Abu Dhabi Sep 2026 – Present

- Only developer at the company; responsible for moving all operations from the legacy ePROMIS ERP to Tricore ERP
- Building the Tricore inventory module: material issues, receipts, returns and transfers, set up to match how each store already works
- Writing SQL Server scripts to migrate ePROMIS data and manage user access by store, with checks before every change and full audit logging
- Running ePROMIS and Tricore side by side during testing so staff can switch without interrupting daily work

Software Engineer, Al Madina Group, Abu Dhabi Sep 2025 – Aug 2026

- Built HelpDesk, a facility management system used by 100+ staff across 19 Almadina HyperMarket branches, with an ASP.NET Core web portal and a React Native (Expo) app for field technicians
- Set up the service ticket workflow (raise, assign, complete, close) with priorities and real-time push notifications through SignalR
- Added asset and inventory tracking, purchase orders that update stock automatically, and barcode scanning from the mobile app
- Designed role-based and per-branch permissions and followed OWASP Top 10 guidelines for security
- Built RDLC reports (PDF, Excel, Word) and live dashboards showing performance by branch

Senior Software Developer, Skien Software Lab Sep 2023 – Sep 2025

- Worked on Skien.Suite, the company's ERP product, bringing core business modules into one platform, and handled 2 to 3 client implementations at the same time
- Contributed to Skien.eCommerce, building features for B2B, B2C and enterprise online stores
- Wrote backend services in .NET Core, C#, ASP.NET MVC, Entity Framework and SQL Server, and front ends in Angular.js, JavaScript and jQuery
- Tracked down production issues and tuned application and database performance for clients
- Spent 10 months onsite in Bahrain (May 2023 – Feb 2024) supporting Foodworld Group's live system: fixing issues, correcting data and working directly with the client

Software Developer, Skien Software Lab Oct 2021 – Sep 2023

- Built and maintained .NET web and mobile applications for business clients
- Developed front-end screens in HTML, CSS, Angular.js and jQuery, and backend logic in .NET Core, C#, ASP.NET MVC, Entity Framework and SQL Server
- Debugged and fixed issues as part of a team delivering to client deadlines

Skills

- **Backend:** C#, ASP.NET Core, ASP.NET MVC, .NET Core, Entity Framework Core, REST APIs, SignalR
- **Database:** SQL Server, T-SQL, stored procedures, query tuning, data migration
- **Frontend and mobile:** React Native, Expo, Angular.js, JavaScript, jQuery, HTML, CSS
- **Reporting and tools:** RDLC reports, Git, ERP systems (ePROMIS, Tricore)

Education

Bachelor of Computer Applications (BCA), University of Calicut 2018 – 2021
